by the Parliament of Asgardia

CREATING A SPACE NATION

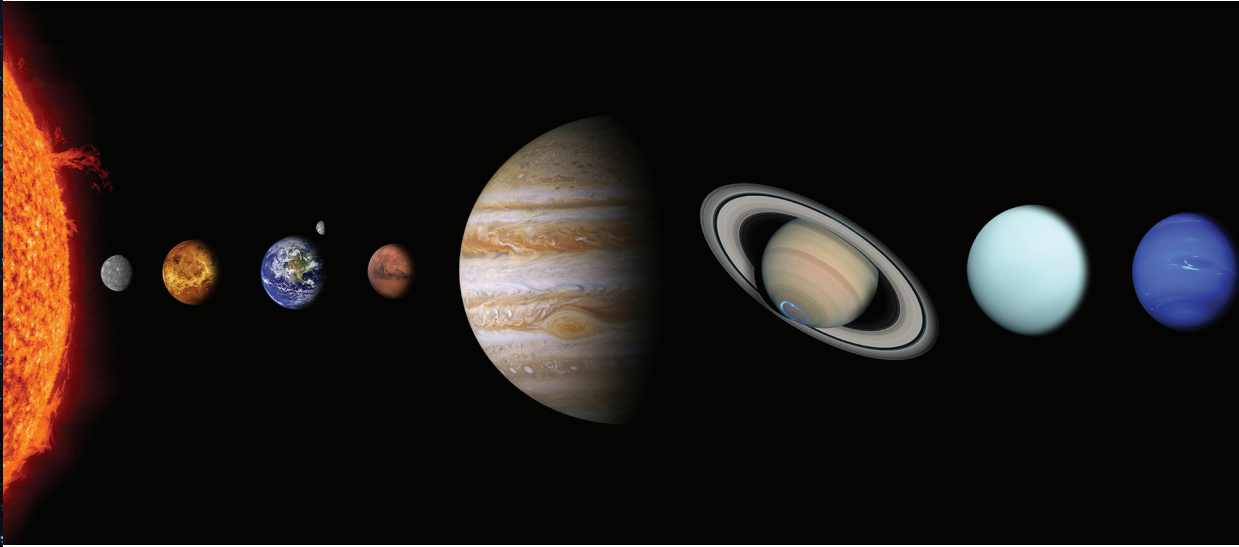

On 12 October 2016, at a press conference in Paris, Igor Ashurbeyli, a distinguished aerospace scientist, visionary and philanthropist, announced the creation of Asgardia, the first space nation in the history of humanity.

It is a global, integrative project, aimed at fostering peace, providing free access to space technologies for all nations and their citizens, and protecting planet Earth from natural and man-made threats from outer space.

Asgardia's concept comprises three parts – philosophical, legal and scientific/technological

Asgardia invites everyone into the future

PHILOSOPHY

Asgardia's philosophy began with selecting the nation's name – Asgardia. In ancient mythology, Asgard was a country in the skies, the country of gods, the country of dreams.

Asgardia's distinction in the philosophical sense is serving all humanity and every individual regardless of their personal prosperity or the prosperity of their country of origin

Asgardia's philosophical envelope is to 'digitalise' the Noosphere, the mirror image of humanity in space, but without the Earthly division into states, religions and nations. In Asgardia, we are all – Earthlings!

**Asgardia's motto is:
One Humanity – One Unity.**

Asgardia is a nation of free-thinking people

LEGALITIES

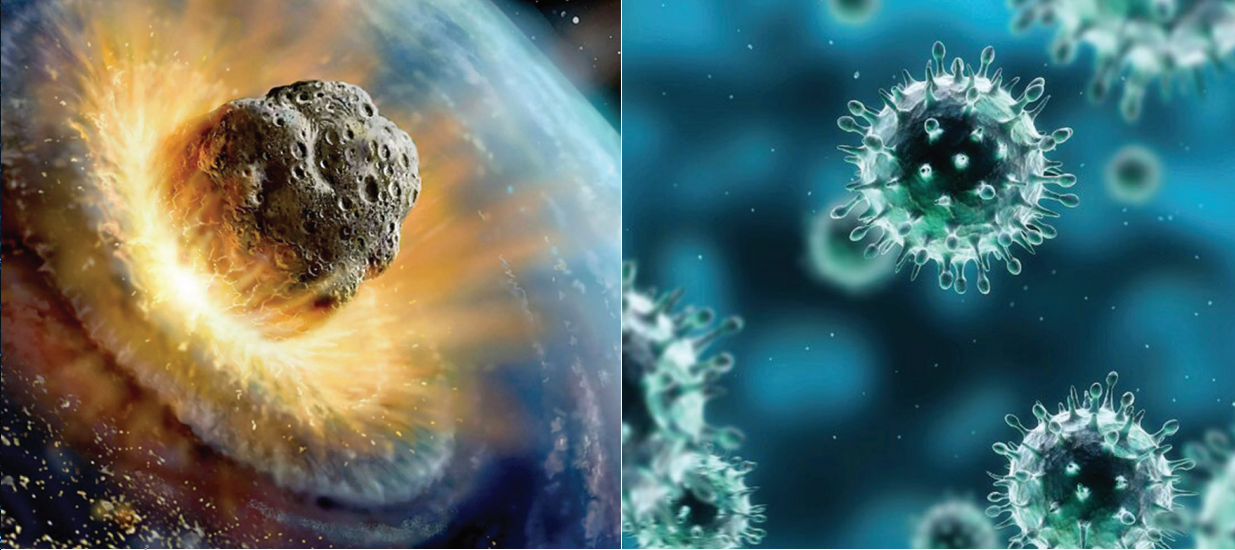

Many of the problems relating to global space law remain unresolved. There is too much influence of geopolitical conflicts, rooted in the history of Earthly nations. That is why it is time to create a new judicial reality in space.

Asgardia's core principle is that future space law should not become the law of the jungle. Today, only about 20 countries on Earth, out of about 200, have a space presence and lay their claim to a monopoly and certain exclusivity.

Future space law must provide equal opportunities to all countries, not just to the ones that already have active space programmes and commercial interests in space

A core legal principle is that Asgardia does not interfere in relations between states on Earth – and vice versa.

Asgardia proposes 'astropolitics' as opposed to 'geopolitics'

SCIENTIFIC AND TECHNOLOGICAL

Peace, Access and Protection are the three scientific and technological goals of Asgardia

PEACE

- to ensure the peaceful use of space.

ACCESS

- to create a demilitarised and free scientific base of knowledge in space. This will provide free access for all, especially for those in developing countries who do not currently have access to space access. Such access should be free and direct.

PROTECTION

- to protect planet Earth from natural and man-made space threats.

Asgardia opens up space for everyone

TECHNICAL INFRASTRUCTURE

Asgardia's technical structure in space is comprised of three types of segments.

Orbital segments:

Satellites

Clusters of network-centric small satellites and nanosatellites

Protective space platforms

Space arcs

Earthly segments:

Mission Control Center

Launch facility

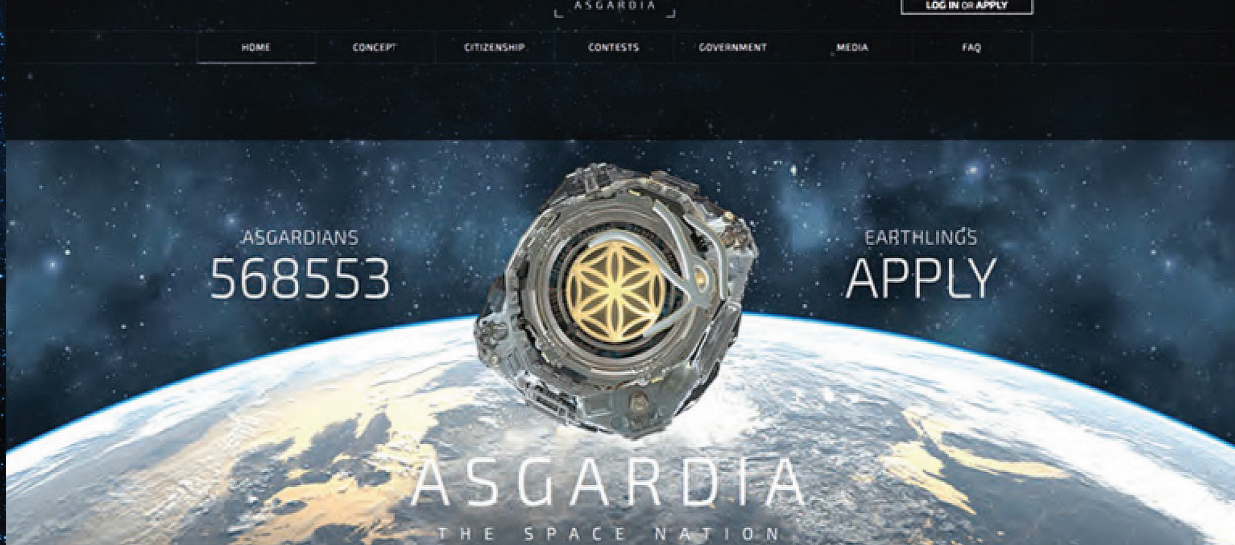

Mission center

Manufacturing center

Moon segments: settlements and businesses.

Asgardia will protect planet Earth

FIRST HALF A MILLION PEOPLE

The official website, asgardia.space, was launched on 12 October 2016, and more than 100,000 people applied in the 40 hours following the announcement of Asgardia's creation. More than 500,000 applied in the first 20 days

Presently, the counters on the site show the current number of Asgardians who have passed the 2nd and 3rd levels of verification and have voted for the Constitution, the flag, coat of arms and anthem of Asgardia.

Every new Asgardian receives a certificate with a unique ID number.

This ID number will be used for receiving an ID card and passport, as well as various government services, including social and banking services.

In Asgardia we are all - Earthlings

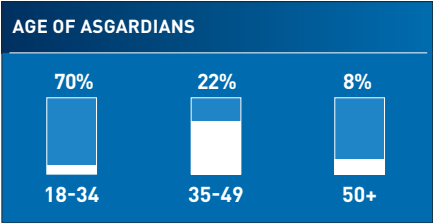

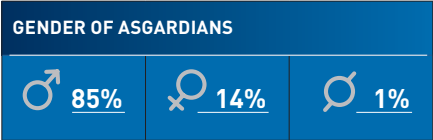

WHO ARE WE, ASGARDIANS?

The current population of Asgardia is comprised of citizens of more than 200 Earthly nations, 175 of which are members of the UN.

The Asgardia administration team organises regional groups on forums and in social networks to allow Asgardians to communicate in their native languages.

LANGUAGES OF ASGARDIANS			
english	45%	french	2,9%
spanish	11%	portuguese	2,3%
chinese	9,5%	hindi	1,8%
turkish	9%	arabic	1,7%
italian	5%	german	1,3%
russian	3%	farsi	0,1%

Asgardia needs altruists and dreamers

STATEHOOD

Asgardia is a future member of the United Nations with its own Constitution, Parliament, a government and embassies, a Prosecutor General's Office, a National Audit Office, a flag, an anthem, a coat of arms and so on

UNITY DAY

CONSTITUTION

UNIFIED VOTING DAY – 18 JUNE 2017/1 ASGARD 0001

- ▶ The Declaration of Unity of Asgardia and the Constitution have been accepted.
- ▶ The national symbols of Asgardia have been selected.
- ▶ The Central Electoral Commission has begun working in preparation for Asgardia's parliamentary elections.

Out of 140,000 Asgardians who took part in the voting, 101,500 (or 72.5%) voted in support of the Constitution

Asgardia creates new space law

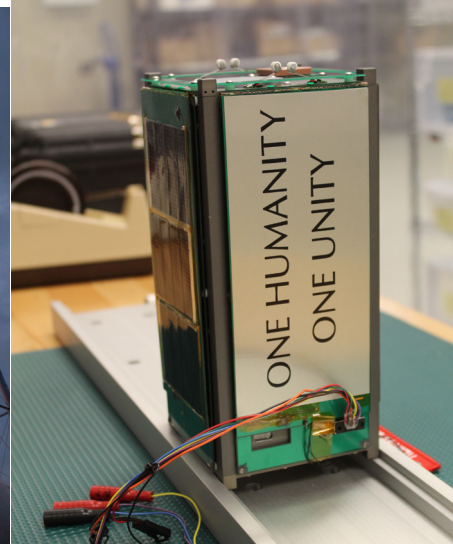

HEAD OF NATION

On 20 January 2017, **by Decree No 1**, after more than 150,000 people residing in more than 150 countries had expressed their support, Igor Ashurbeyli was officially announced as the Head of Nation by Decree 1.

In accordance with section 2 of Article 32 of the Constitution of Asgardia, on 10 September 2017, **by Decree No 10**, Igor Ashurbeyli officially assumed the position of the Head of Nation.

He personally instituted a constitutional limit on the duration of his term as the Head of Nation of Asgardia to be five years

TERRITORY

On 12 November 2017, the Asgardia-1 satellite was successfully launched from the Wallops flight facility (Virginia, USA). Thus, Asgardia officially became the first nation with territory in space.

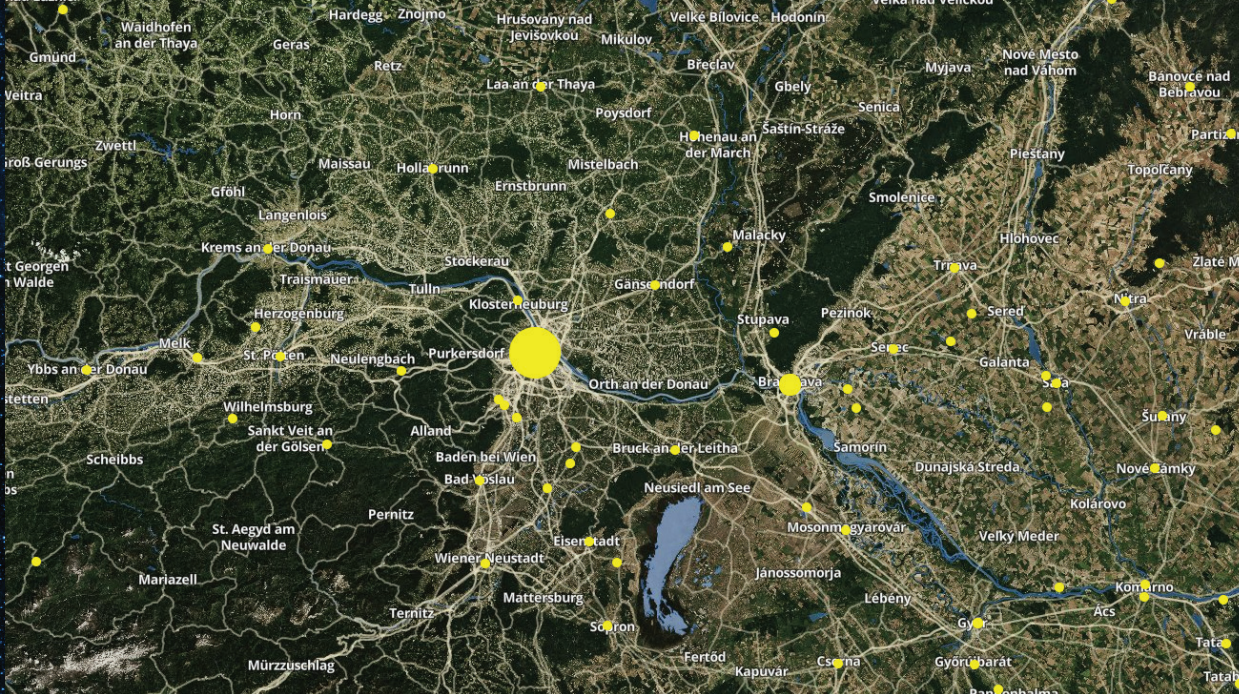

The satellite carries the Constitution, the national symbols and the data of Asgardians.

Asgardia-1 is not only the data centre of the space nation, but is also on a research mission: the satellite will allow checking the impact of cosmic radiation on the storage of digital data.

The number of Asgardians has gone up more than 40% since the launch of the Asgardia-1 satellite

We are not the best – we are the future

Map of Asgardians, view from Vienna, Austria

MAP

A unique map of Asgardia shows the location of Asgardians on planet Earth. The map shows Earthly cities with the number of Asgardians residing in each of them.

Asgardia does not see Earthly boundaries. That is why all Earthly cities are marked with the same colour on the map of Asgardia.

This map will become an effective tool for the global communication among Asgardians

Asgardia is a nation without boundaries

ECONOMICS

Asgardia is currently represented on Earth by three legal entities registered in Vienna (Austria)

Asgardia NGO – noncommercial, nongovernmental organisation Asgardia, registered as the prototype of the future space nation. All of the civil servants of Asgardia will work here.

Asgardia International Research Centre (AIRC) – Asgardia's main research vehicle that focuses on three aspects of scientific and technological development of the nation: Earthly objects, orbital clusters and Moon settlements; an ecosystem and cryptocurrency; a global social-informational network.

Asgardia AG – an investment company that accepts funds from investors for the purpose of creating space startups in the area of technological programmes. Programmes are aimed at the development of the nation in general, as well as specific projects.

Asgardia – the nation of startups and philanthropists

ASGARDIAN CALENDAR

The calendar is based on the concept of the International Fixed Calendar and adapted for use by the space nation Asgardia.

Asgardian month – 28 days

	01 sun	02 mon	03 tue	04 wed	05 thu	06 fri	07 sat	08 sun	09 mon	10 tue	11 wed	12 thu
January	01	02	03	04	05	06	07	08	09	10	11	12

October	08	09	10	11	12	13	14	15	16	17	18	19
November	05	06	07	08	09	10	11	12	13	14	15	16
December	03	04	05	06	07	08	09	10	11	12	13	14

Examples: 19 August by the Gregorian calendar is 7 August by the Asgardian calendar
3 July by the Gregorian calendar is 16 Asgard by the Asgardian calendar

Every year and every month of the Asgardian calendar begins with Sunday, because each date always corresponds to the same day of the week

The Asgardian calendar uses a 13-month format of 28 days each, and one day that does not belong to any month, which is called Year Day and coincides with 31 December. The year starts on 1 January. The additional month of the year is called Asgard, and it is between June and July in the Gregorian calendar.
