## BEGINNING

Dr Igor Ashurbeyli, a distinguished aerospace scientist, visionary and philanthropist, announced the creation of Asgardia, the first Space Nation in the history of humanity, at his press conference in Paris on 12 October 2016.

## CONSTITUTION

The creation of a Constitution is a significant milestone in the history of a new Space Nation. A referendum on its approval began on 18 June 2017, a date which was later declared an Asgardian public holiday: National Unity Day. On 9 September 2017, Igor Ashurbeyli approved the results of the vote on Asgardia's Constitution: 72.5% of Asgardians voted in favour of the proposed Constitution. In accordance with Article 32 of the Constitution of Asgardia, on 10 September 2017, by Decree No.10, Igor Ashurbeyli officially assumed the position of Head of Nation. The Constitution later became the foundation for parliamentary elections in Asgardia and for the formation of the government and court.

## INAUGURATION

On 25 June 2018, Igor Ashurbeyli was inaugurated as the Head of Nation at the Hofburg Palace in Vienna. The official ceremony was attended by about 500 guests from more than 50 countries: ambassadors, representatives of a number of the largest non-governmental organisations, newly elected Members of Parliament of Asgardia, astronauts, space industry leaders, scientists, international lawyers and media representatives from all over the world.

## MOTTO

**ONE HUMANITY  
ONE UNITY**

## COAT OF ARMS

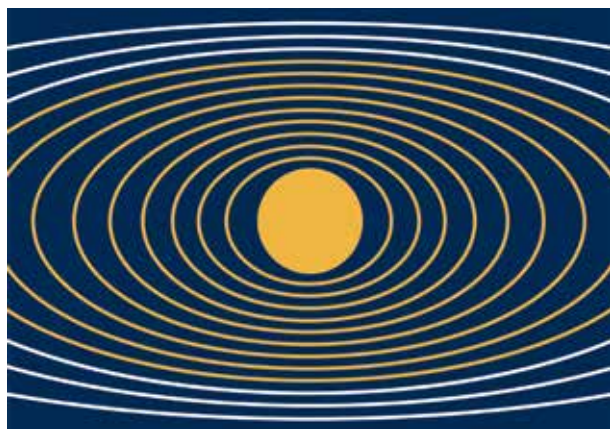

The golden circle represents the Sun, the centre of our solar system. The ancient symbol – ‘Flower of Life’ – the symbol of Asgardia, is encircled by the motto of Asgardia: One Humanity – One Unity. The motto is surrounded by 12 equal and evenly distributed petals, symbolising the equality of all the official languages of Asgardia.

## FLAG

The bright yellow circle in the centre represents the Sun on a blue sky backdrop. Nine yellow orbits symbolise the nine planets of our solar system. Three white external orbits symbolise humanity's infinite future discoveries in space and Asgardia's role in building this future.

## ANTHEM

## MISSION

The birth of the first Space Child on the Asgardia National Ark is our main mission. The implementation of this mission will create the basis for infinite reproduction of the human population in the Universe. The emblem of our mission is a schematic representation of a Space Ark with the Space Child on board, where cosmic radiation protection and artificial gravity are provided.

## ASGARDIA SPACE ARK

## GENESIS

In ancient mythology, Asgard was the home of the gods and a celestial sanctuary for humans dreaming of eternal life. Indeed, many of planet Earth's cultures contain similar mythological images of heavenly dwellings for people.

Asgardia, the name chosen by Dr Igor Ashurbeyli for the Space Nation, symbolises a future 'Noah's Ark' that lays the foundation for Asgardia's paradigm of infinity of the human race in the Universe.

## LEGAL ASPECTS

Geopolitical conflicts on Earth, deep-rooted in the history of Earthly nations, stand in the way of creating a new, fair legal reality in space.

The main legal goal is the creation of an independent state recognised by other countries on planet Earth and the entire humanity.

New space law should not become the law of the jungle. Space exploration will be equally available to all earthly nations and to all people.

A core legal principle is that Asgardia does not interfere in relations between states on Earth – and vice versa.

## BASIC CONCEPTS:

- The Asgardian calendar is a standard. 13-month digital calendar. The reference date is January 1, 2017 by the Gregorian calendar.
- There are 28 days in each calendar month and 91 days in each quarter.

- There are 7 days in each week, and the week starts on Sunday.
- The frequency of the "extra day duplicate" [EDD] is determined by "Morozov's calendar constant": [31/128 days = 0.2421875 days = 20,925 seconds].

- The average length of an Asgardian calendar year is equal to the length of an astronomical tropical year: 365[31/128] days = 365.2421875 days = 31,556,925 seconds.
