BEGINNING

Dr Igor Ashurbeyli, a distinguished aerospace scientist, visionary and philanthropist, announced the creation of Asgardia, the first space nation in the history of humanity, at a press conference in Paris on 12 October 2016.

CONSTITUTION

The creation of a Constitution is a significant milestone in the history of a new Space Nation. A referendum on its approval began on 18 June 2017, a date which was later declared as an Asgardian public holiday: National Unity Day. On 9 September 2017, Igor Ashurbeyli approved the results of the vote on Asgardia's Constitution: 72.5% of Asgardians voted in favour of the proposed Constitution. In accordance with Article 32 of the Constitution of Asgardia, on 10 September 2017, by Decree No.10, Igor Ashurbeyli officially assumed the position of Head of Nation. The Constitution later became the foundation for parliamentary elections in Asgardia and for the formation of the government and court.

INAUGURATION

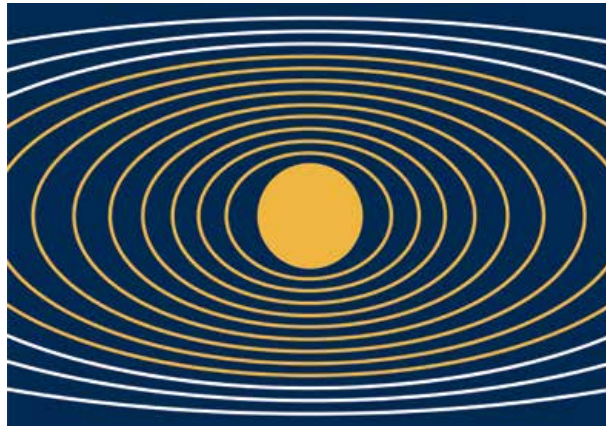

On 25 June 2018, at the Hofburg Palace in Vienna, Igor Ashurbeyli was inaugurated as the Head of Nation: the official ceremony was attended by about 500 guests from more than 50 countries, ambassadors, representatives of a number of the largest non-governmental organisations, recently elected Members of Parliament of Asgardia, astronauts, space industry leaders, scientists, international lawyers and media representatives from all over the world.

COAT OF ARMS

The golden circle represents the Sun, the centre of our solar system. The flower of life, the symbol of Asgardia, is encircled by the motto of Asgardia: One Humanity – One Unity. The motto is surrounded by 12 equal and evenly distributed petals, symbolising the equality of all the official languages of Asgardia.

FLAG

The bright yellow circle in the centre represents the Sun against a blue sky backdrop. Nine yellow orbits symbolise the nine planets of our solar system. Three white external orbits symbolise humanity's infinite future discoveries in space, and Asgardia's role in building this future.

ANTHEM

GENESIS

Asgardia began with selecting the nation's name. In ancient mythology, Asgard was a dwelling place of the gods, the celestial home of dreams.

The concept of a space Noah's Ark, as the saviour of the human race and the entire terrestrial gene pool, formed the basis of Asgardian scientific research and the paradigm of Asgardia space infrastructure.

SPACE ARK

MISSION

The birth of the first Space Child on the Asgardia National Ark is our main mission. The implementation of this mission will create the basis for infinite reproduction of the human population in the Universe. The emblem of our mission is a schematic representation of a space ark with a newborn baby (space child) on board, where cosmic radiation protection and artificial gravity are provided.

LEGAL

The geopolitical conflicts on Earth, deep-rooted in the history of Earthly nations, stand in the way of creating a new, fair legal reality in space.

The main legal goal is the creation of an independent state recognised by other countries on planet Earth.

New space law should not become the law of the jungle. Space exploration will be equally available to all earthly nations and to all people.

A core legal principle is that Asgardia does not interfere in relations between states on Earth – and vice versa.

On 12 November 2017, the Asgardia-1 satellite was successfully launched from the Wallops flight facility (Virginia, USA). Thus, Asgardia officially obtained its first national territory in space – Asgardia National ARK (ANA).

ASGARDIA ON EARTH

We are a Space Nation, but for now we reside on Earth. Asgardia does not see Earthly borders and will not create borders in space. A unique map of Asgardia shows Earthly cities where Asgardians live that are represented as symbolic celestial cities on the map of Asgardia.
